RAFIX 22 FS⁺

RAFIX 22 FS⁺ control component range

- Mounting hole diameter: 22.3 mm to IEC 60947
- Contact blocks with gold or silver contacts
- Depth behind panel only 9.2 resp. 27 mm
- Protection class min. IP65 acc. to DIN EN 60529
- 2 collar shapes, round or square
- The PCB contact blocks can be combined with other components on the same PCB.
- Contact blocks with quick connectors and LED clips
- All products are RoHS compliant.

The specified data apply only if actuators and signal indicators are combined with contact blocks or LED within the same product range.

RAFIX
22 FS⁺

RAFIX 22 FS⁺

Control components of the future

The RAFIX 22 FS⁺ series is setting new standards in the world of control components. Extremely flat construction and functional aesthetic design are essential in an increasingly design-oriented industrial environment. The wide variety and variability of the actuators give your designer complete freedom: round or square collar types, radiant colours and homogenous illumination of the large actuat-

ing areas are among the basic features. Combined with the various front rings, they ensure that you can create a panel with a truly distinctive design. For example, a defined colour can be consistently assigned to a specific command. In addition, the large number of colour options available for the front rings enables easy customisation to suit the corporate design of different OEMs.

2

RAFIX
22 FS⁺

Fast

The fastest connection type for every application: with a printed circuit board or directly with quick-connect terminals.

- A printed circuit board is the best and fastest solution, starting with medium quantities. Moreover, PCB contact blocks can be ideally combined with displays, tactile switches and other electronics on a common printed circuit board.
- Alternatively, QC contact blocks can be easily snapped into the actuators without tools. Male quick-connect terminals are used directly for wiring in a conventional manner. This is a fast and efficient variant for applications where a printed circuit board is not cost-effective.

+ PLUS

RAFIX 22 FS⁺ has additional benefits for you:

- Various actuators and contact block options – a complete series
- Variable thanks to round or square operating elements
- Variable thanks to gold contacts from 5 V or silver contacts up to 250 V
- Short-travel adapter for short-travel actuation (1 mm switching travel) with perceptible key click
- Variable design thanks to various front ring colours
- Variable illumination, compatible with 3 mm THT LEDs or SMT LEDs

SLIM

Now it's a snap to slim the design of your control systems thanks to the low mounting depth.

- Designs with PCB contact blocks feature a distance between the front panel and printed circuit board of only 9.2 mm; the same applies to contact blocks with silver contacts for the mains voltage. That's as slim as it gets.
- Also when fitted with QC contact blocks, RAFIX 22 FS⁺ panels are unbeatably flat. Requiring only 27 mm of space behind the front panel, they provide tremendous design scope for inspiring control panels.

CONTROL COMPONENTS

RAFIX 22 FS⁺ CONTROL COMPONENTS

RAFIX 22 FS⁺

The RAFIX 22 FS⁺ series has a variety of actuators with round or square collar types:

Pushbuttons

- Illuminable
- With flush or protruding lens
- With flush or protruding front ring
- With protective cap
- With exchangeable FLEXLAB lens
- With illuminated front ring (optional)

Selector switches

- Rotating angle 40°, 60° or 90°
- Latching or momentary
- Illuminable

Keylock switches

- Rotating angle 40° or 90°
- Latching or momentary

Signal indicators

- Green, yellow, red, blue or white

Approvals

- IEC 60947-5-1/5
- UL
- CCC

Safe and reliable

The actuators in the RAFIX 22 FS⁺ series consistently ensure a degree of protection to at least IP 65, which makes them suitable for many diverse applications.

Durable

The mechanical design of all actuators is optimally suited for long-lasting operation even in heavily used panels.

Mounting hole

The actuators in the RAFIX 22 FS⁺ series are suitable for 22.3 mm panel cut-outs according to IEC 60947-5-1.

All actuators are equipped with a locating pip. This locating pip ensures a perfect fit for actuators and contact blocks with PCB-mounted components and is therefore essential for designs including these contact blocks.

Grid spacing

The design principle makes it possible to use a minimum grid spacing of 30 mm x 30 mm. In such an arrangement, actuators with square collars can be aligned directly without any gaps.

When choosing the grid spacing, it is recommended to consider any external legending required (for example, using label strips inserted into the front panel).

Dimensional drawing with PCB contact block

<p>Formula for spacer length</p> $\frac{9.2 \text{ mm} - \text{Front panel thickness}}{\text{Length of spacer}}$
--

RAFIX 22 FS⁺

PCB contact blocks

A printed circuit board is the best and fastest solution, starting with medium quantities. In addition, PCB contact blocks can be ideally combined with displays, short-travel keyswitches and other electronics on a common printed circuit board. Designs with PCB contact blocks feature a distance between the front panel and printed circuit board of only 9.2 mm; the same applies to contact blocks with silver contacts for the mains voltage.

The printed circuit board is attached to the front panel with bolts, while the contact blocks are almost fully immersed in the actuators. This gives the entire system a very low profile. Further benefits: individual wiring is not required, and it is no longer necessary to cut out the printed circuit board around the control components.

FAST: Simply include the PCB contact blocks and LEDs in the layout of the printed circuit board and solder them during production – done as simply as with the other components on the common printed circuit board.

Assembly: Cost savings and reduction of assembly errors. The PCB contact blocks are soldered on the printed circuit board. Two options are available for actuator illumination:

1. A 3 mm THT LED that is inserted into the base of the contact block and soldered together with the contact block on the printed circuit board.
2. A separately placed SMT LED that produces light which is transported by the light conductor and distributed over the entire surface of the lens.

SLIM – enabling lean operation

Designs with PCB contact blocks feature a distance between the front panel and printed circuit board of only 9.2 mm; the same applies to contact blocks with silver contacts for the mains voltage. That's as slim as it gets.

CONTROL COMPONENTS

RAFIX 22 FS⁺ CONTROL COMPONENTS

RAFIX 22 FS⁺ PCB

Putting it all together

As part of the system design, the printed circuit board is attached to the front panel using threaded studs. This one-off construction measure ensures that no assembly errors can occur that would require subsequent troubleshooting. Very cost-effective for large quantities.

2

RAFIX 22 FS⁺

Spacers

A distance of 9.2 mm behind the front panel must be maintained. See the RAFI accessories for the necessary spacers.

Formula for spacer length

RAFIX 22 FS⁺ and RAFIX 22 FSR

$$\frac{9.2 \text{ mm} - \text{Front panel thickness}}{\text{Length of spacers}}$$

Benefits

- The extremely low mounting depth is unique and enables applications with entirely new housing and machine designs
- The series can be combined with RAFI short-travel keyswitches to tailor the operation to particular customer applications
- Standardised production with printed circuit boards pays off for large quantities and cuts assembly costs

Optimal applications meet the following conditions

- Usage of a printed circuit board is already planned. Printed circuit boards pay off for large quantities since production can be standardised.
- Short-travel keyswitches are used. RAFIX FS PCB contact blocks can be combined, for example, with RAFI short-travel keyswitches from the series MICON 5, RACON 8/12, RF 15/19 and KN 19.
- Tight space requirements: RAFIX FS technology can be used to realise smaller housing formats. This leads to savings on materials as well as tool costs.

Key points at a glance

- Mounting depth only 9.2 mm
- PCB contact blocks with printed circuit board THT terminal
- Gold contacts for totally reliable switching at low voltages (min. 5 V / 1 mA) or
- Silver contacts (max. 250 V / 4 A) for mains voltage
- Contact assignments: 1 NC, 1 NO, 2 NC, 2 NO, 1 NC + 1 NO, or for safety-relevant applications 2 NC + 1 NO (emergency stop "Plus 1")
- Illumination with LEDs in various colours
- Compatible with all RAFIX 22 FS⁺, RAFIX 22 FSR and RAFIX FS 30 actuators such as pushbuttons, selector switches, keylock switches, emergency stop buttons and signal indicators with all the benefits of this series

Combination of RAFIX 22 FS⁺ with RAFI short-travel keyswitches on a common printed circuit board

Top half: RAFI short-travel keyswitches RACON 8/12, MICON 5, RF 15/19, short-travel mains switch KN 19
Bottom half: RAFIX FS contact blocks, some with 3 mm THT LEDs

RAFIX 22 FS⁺ QC

The system

For the actuators in the RAFIX 22 FS⁺, RAFIX 22 FSR and RAFIX 30 FS⁺ series, RAFI offers QC contact blocks with plug-in connection. All it takes is a “click” to latch the contact block into the fixed actuator for a solid connection.

The concept

In cases where usage of a printed circuit board is not feasible or cost-effective, QC contact blocks provide an economical alternative. Locating lugs on the contact block latch into the actuators with precision in the millimetres. Matching guides are arranged in the thread to ensure a solid connection. Wiring the contact block is easy due to the standard male quick-connect terminals. As an isolation aid, there is a middle fin which is also used as a guide for the optional LED clip.

The QC contact block rounds out the RAFIX 22 FS⁺, RAFIX 22 FSR and RAFIX 30 FS⁺ series, making them suitable for all customer requirements. Separately installed control devices can be **easily** integrated into the system **without any tools**, helping users to save space, work expense and materials.

Assembly

The colour marking on the actuator thread and contact block helps to prevent incorrect assembly, thereby simplifying the assembly process. Briefly press the contact block and it will securely latch into the actuator (“click to install”).

Benefits

- Very fast and simple attachment of QC contact blocks saves valuable assembly time.
- The fixed connection between the contact block and actuator is suitable for applications with tremors and vibrations.
- Cable harnesses can be preassembled with the contact blocks.

Optimal applications meet the following conditions

- Usage of a printed circuit board is not cost-effective, for example away from main control points (e.g. emergency stop application in a hazard area).
- Typical control components need to be installed quickly. The installation time is significantly shorter for RAFIX QC contact blocks than for other available control component concepts.
- Significant vibrations and tremors are present. All parts are solidly connected.
- Other components need an appropriate amount of space.

RAFIX FS QC: Key points at a glance

- Mounting depth only 27 mm including LED clip and cable lugs
- QC contact blocks with quick-connect/solder terminals 2.8 x 0.8 mm
- The QC contact block engages permanently with the actuator only at the time of final assembly
- Compatible with all RAFIX 22 FS⁺, RAFIX 22 FSR and RAFIX 30 FS⁺ actuators such as pushbuttons, selector switches, keylock switches, emergency stop buttons and signal indicators with all the benefits of this series
- Protection against contact for quick-connect terminals and cable lugs: short-circuit-proof even when the connection wires are under tensile strain
- Gold contacts for totally reliable switching at low voltages (min. 5 V / 1 mA) or
- Silver contacts (max. 250 V / 4 A) for mains voltage
- Contact assignments: 1 NC, 1 NO, 2 NC, 2 NO, 1 NC + 1 NO, or for safety-relevant applications 2 NC + 1 NO (emergency stop “Plus 1”)
- Illumination with replaceable and extremely bright LED clips in various LED colours, with quick-connect terminals 2.8 x 0.8 mm
- Actuators / contact blocks, signal indicators / lamp sockets and LED clips can be stocked separately and are not connected until final assembly. In this manner, the product range ensures maximum flexibility along with economical inventory management.

RAFIX 22 FS⁺ Pushbuttons FLEXLAB

→ The RAFIX 22 FS⁺ FLEXLAB pushbutton allows individual control component labeling. A DIN A4 label sheet with pre-cut labels which fits in customary office laser printers is available for this option. After the legend inserts are printed, they be detached from the sheet and inserted into the colored lens using the fine stop tabs.

CONTROL COMPONENTS

RAFIX 22 FS⁺ - ACTUATORS

Panel cut-out to IEC 60947-5-1

RAFIX 22 FS⁺ Emergency stop pushbuttons

→ The emergency stop pushbuttons comply with IEC 60 947 and VDE 0113 Part 1.

They are designed dupe-proof according to EN 418 with a positive mechanical movement sequence. A certain operating force must be exerted at the action point in order to prevent inadvertent operation. The pushbutton latches when pressed.

The special shape of the actuator prevents the emergency stop pushbutton from being blocked. This means that the emergency stop process - once initiated - cannot be impeded by any jamming objects.

Please only combine with „emergency stop“ contact blocks.
Original operating instructions see Appendix.

RAFIX 22 FS⁺ Emergency stop pushbuttons „Plus 1“

→ RAFIX 22 FS „Plus 1“

Emergency stop pushbutton with 2 NC and 1 signal contact.

This special emergency stop pushbutton offers two redundant normally-closed contacts for the emergency off / emergency stop function and an additional signal contact. Unique design: 3 contacts accommodated in very compact dimensions (mounting depth 9.2 or 27 mm).

2 normally-closed (NC) contacts

Redundancy is more and more often a requirement for safety applications in mechanical engineering and control system development and helps to minimise the probability of failure of a system.

1 signal contact

The third contact – a normally-open contact – may be used, for example, for sending an information signal to a monitoring unit or master safety controller. The safety controller may then initiate a controlled shutdown, depending on the location and type of the hazard indicated.

The signal contact is only for impulse function and must not be used as a lasting NO contact.

The emergency stop pushbutton complies with the current standards. The positively guided mechanical movement of the pushbutton makes it dupe-proof according to DIN EN ISO 13850.

A RAFIX 22 FS „Plus 1“ emergency stop unit consists of a special emergency stop pushbutton and a suitable emergency stop contact block which can either be mounted directly (quick-connect terminals) or placed on a printed circuit board (THT version).

Only use with emergency stop „Plus 1“ contact blocks.

Original operating instructions see Appendix.

TOUCH

RAFIX 22 FS⁺

Fast & Slim. Everything else is a thing of the past

RAFIX 22 FS⁺ control components are fast and slim. Fast because they're simple to connect, either on a PCB or directly with quick-connect terminals. Slim because of their extremely small mounting depth that leaves plenty of room for additional components and individual designs.

RAFIX 22 FS⁺ USB feedthroughs

→ Rugged USB feedthroughs for 22.3 mm mounting hole diameter matching the RAFIX 22 FS and RAFIX 22 QR actuator series. The USB feedthrough provides sturdy installation of an easily accessible USB slot in front panels of controllers and IPCs and can be used, for example, to connect a keyboard for maintenance purposes or a USB stick for a software update. The port on the rear accommodates commercially available USB cables of varying lengths with B-type connector. A sealing cap protects the slot and ensures a degree of protection to IP 65. For assembly, simply insert the feedthrough from the front side into the mounting hole and fasten it by means of a ring nut from the rear. The depth behind panel is 27.7 mm. The color of the front ring can be freely selected so that the USB feedthrough can be matched in appearance to the customer-specific design.

RAFIX 22 FSR

Extremely rugged and economically unbeatable! RAFIX 22 FSR features proven RAFIX FS technology and a rugged design. The control components have a low mounting depth which saves a lot of space and enables fast installation. Pushbuttons and actuators provide for quick orientation and a clearly distinctive design thanks to their individually combinable colors and shapes.

RAFIX
22 FSR

RAFIX 22 FSR

WHEN THE GOING GETS TOUGH

Harsh weather conditions. Dirt and dust are swirling around, and the sun is beating down mercilessly. It's critical to keep pushing ahead – fast. A dirty glove dripping with lubricants pounds a key vigorously, and work goes on!

The cloud cover is increasing, it's raining, the temperature drops below the freezing point and it starts sleeting. Ice crystals stick to the operating elements, but the machinery keeps on running. Dust, dirt, lubricants, moisture, heat and

cold: Close to the limit, solutions are required which are extremely rugged, hard-wearing and tough-natured. RAFIX 22 FSR has taken on this challenge. Under the most adverse conditions, these actuators and contact blocks demonstrate their strengths: ruggedness and know-how based on proven FS technology. A series specifically developed for outdoor applications, RAFIX FSR withstands extreme conditions – with no ifs, ands or buts.

2

RAFIX
22 FSR

Close to the limit

Extremely rugged and economically unbeatable! RAFIX 22 FSR features proven FS technology and a rugged design. The contact blocks have a low mounting depth, which saves an enormous amount of space and enables fast installation. The pushbuttons and actuators ensure quick orientation along with a highly distinctive design thanks to their individually combinable colors and shapes.

The top performer

Dirt: No matter whether it is exposed to industrial lubricants or soiling which occurs naturally during outdoor use – the series is extremely resistant and delivers what it promises.

Rugged: The actuator mechanism is not affected even by harsh conditions and severe external impacts.

Climate: Intense sunlight, heavy rain, hail or snow – RAFIX 22 FSR easily withstands adverse weather conditions.

Moisture: Waterproof actuators (IP65 and IP69K) ensure dependable operation.

SLIM

- Designs with PCB contact blocks feature a distance between the front panel and printed circuit board of only 9.2 mm.
- With QC contact blocks, only 27 mm of space is needed behind the front panel.

Combinable with all contact blocks and accessories with RAFIX FS technology

- PCB or QC contact blocks
- Gold contacts from 5 V or silver contacts up to 250 V
- Short-travel adapter enables short-travel actuation (1 mm switching travel) with perceptible key click
- Variable illumination, compatible with 3 mm THT LEDs / SMT LEDs or LED clip

CONTROL COMPONENTS

RAFIX 22 FSR CONTROL COMPONENTS

RAFIX 22 FSR

The RAFIX 22 FSR series has a variety of actuators and signal indicators

Pushbuttons

- Illuminable
- With protective cap

Emergency stop

- Unlocked by pulling
- Illuminated (optional)
- Metal version (optional)

Selector switches

- Rotating angle 40°, 60° or 90°
- Latching or momentary
- Illuminable

Keylock switches

- Rotating angle 40° or 90°
- Latching or momentary
- With protective cap

Signal indicators

- Green, yellow, red, blue or white

Approvals

- IEC 60947-5-1/5
- UL
- CCC

Safe and reliable

The actuators in the RAFIX 22 FSR series ensure a degree of protection to at least IP65 (DIN EN 60529), IP69K (ISO 20653), which makes them suitable for many diverse applications.

Long operating life

The mechanical design of all actuators is optimally suited for long-lasting operation even in heavily used panels.

Mounting hole

The actuators in the RAFIX 22 FSR series are suitable for 22.3 mm panel cut-outs according to IEC 60947-5-1.

All actuators are equipped with a locating pip. This locating pip ensures a perfect fit for actuators and contact blocks with PCB-mounted components and is therefore essential for designs including these contact blocks.

Grid spacing

The design principle makes it possible to use a minimum grid spacing of 35 mm x 35 mm.

When choosing the grid spacing, it is recommended to consider any external legending required (for example, using label strips inserted into the front panel).

CONTROL COMPONENTS

RAFIX 22 FSR - ACTUATORS

RAFIX 22 FSR Pushbuttons

→ The RAFIX 22 FSR pushbutton is equipped with a protective cap. The pushbutton is resistant to external impacts and offers a degree of protection to IP 65 and/or IP 69 k as per IEC 60529, which means protection against the ingress of water when highly pressurized water/steam jet cleaners are used at a pressure of 80 – 100 bar.

Preliminary technical data

Due to increasing application experience the specifications of this product are successively added. For current status, see RAFI online catalog at www.rafi.de.

RAFIX 22 FSR Emergency stop pushbuttons

- The emergency stop pushbuttons comply with IEC 60 947, and VDE 0113 part 1. The positively guided mechanical movement of the pushbuttons makes them dupe-proof according to DIN EN ISO 13850. To prevent accidental actuation, the pushbutton has a pressure point which must be pressed first before the pushbutton snaps into place in the pressed position. The emergency stop pushbutton is non-blocking thanks to the actuator's design. For example, an initiated emergency stop procedure cannot be interrupted by jammed objects. Use only with an emergency stop contact block.

Original manual, see Appendix.

Mounting hole

The actuators in the RAFIX 30 FS⁺ series are designed for 30.3 mm mounting holes.

All actuators are equipped with a locating pip. This locating pip ensures a perfect fit for actuators and contact blocks with PCB-mounted components and is therefore essential for designs including these contact blocks.

RAFIX
30 FS⁺

Grid spacing

The design principle makes it possible to use a minimum grid spacing of 35 mm x 35 mm. When choosing the grid spacing, it is recommended to consider any external legending required (for example, using label strips inserted into the front panel).

Contact
blocks

RAFIX FS Technology Contact Blocks

Combination with actuators

The RAFIX FS contact blocks can be combined with appropriate actuators from the following product families:

- RAFIX 22 FS⁺
- RAFIX 22 FSR
- RAFIX 30 FS⁺

PCB contact blocks

PCB contact blocks are arranged with other components on a common printed circuit board. The unit can then be attached behind the front panel with the actuators and signal indicators. This allows the contact blocks to "float" right below the actuators on the printed circuit board, leaving plenty of room for other components. In the

centre channel of the contact blocks, either light conductors are integrated to allow usage of SMT LEDs, or 3 mm THT LEDs can be mounted to provide illumination.

PCB mounting depths

- 9.2 mm for RAFIX 22 FS⁺ and RAFIX 22 FSR
- 15.7 mm for RAFIX 30 FS⁺

QC contact blocks

QC contact blocks can be easily snapped into the actuators without tools. Male quick-connect terminals are used directly for wiring in a conventional manner. This is a fast and efficient variant for applications where a printed circuit board is not cost-effective.

QC mounting depths

- 26.8 mm for RAFIX 22 FS⁺ and RAFIX 22 FSR
- 32.8 mm for RAFIX 30 FS⁺

Contact materials / data (PCB & QC)

The Au / Ag versions of the PCB and QC variants are distinguished by the colouring scheme of the housing:

- Gold contacts for low voltages up to 35 V / 100 mA: grey housing
- Silver contacts up to 250 V / 4 A: black housing

Contact assignments (PCB & QC)

The assignments are indicated with different plunger colours:

- Normally-closed contact (NC) = red
- Normally-open contact (NO) = green
- NC + NO for emergency stop = yellow

The following contact assignments are available:

- 1 normally-closed contact (1 NC)
- 1 normally-open contact (1 NO)
- 2 normally-closed contacts (2 NC)
- 2 normally-open contacts (2 NO)
- 1 normally-closed contact and 1 normally-open contact (1 NC + 1 NO)
- 2 normally-closed contacts and 1 normally-open contact (2 NC + 1 NO), only emergency stop "Plus 1"

Universal / emergency stop versions (PCB & QC)

The universal and emergency stop versions differ in terms of the position of the plungers:

- Universal = plunger outside
- Emergency stop = plunger inside

As a result, only the following combinations are possible:

- Universal contact blocks with pushbutton, selector switch and keylock switch
- Emergency stop contact blocks with emergency stop and mushroom pushbutton

Illumination / LED types (for PCB version only)

- Version with light conductor for SMT LED
- Version without light conductor for 3 mm THT LED

RAFIX 22 FS Contact blocks PCB gold

→ Illumination information

The PCB contact blocks are included into the PCB layout and arranged next to other components. They are located directly behind the actuators at a distance of only 9.2 mm behind the front panel.

When actuators shall be illuminated there are 2 alternative LED technologies.

THT LEDs: Can be assembled and soldered together with the PCB contact blocks.

SMT LEDs: Can be pre-assembled and soldered with other SMT components. Then they are covered by the PCB contact blocks with light conductor.

CONTROL COMPONENTS

RAFIX FS - CONTACT BLOCKS QC GOLD

RAFIX 22 FS⁺ Contact blocks QC gold

→ The contact blocks are inserted into the actuators and latch there permanently. Emergency stop pushbuttons require special contact blocks which can be recognised by the plungers situated closer to the middle. In addition, the emergency stop contact blocks and actuators feature two assembly guides which prevent rotation during assembly. We recommend to choose the LED color in the same color as the lens of the actuator in order to ensure satisfactory illumination.

SMT LED

→ Description	Order no.
---------------	-----------

For the best illumination of actuators and signal indicators we suggest to use the following SMT LED type: OSRAM LT P4SG

LED base for 3 mm THT LED, used in signal indicators, for RAFIX FS PCB

→ Description	Order no.
LED base for signal indicators, height 5 mm	5.30.109.020/0756

THT LED 3 mm, without base

→ Color	Forward voltage typ. U_F at I_F	Max. current, I_F	Order no.
red	1,6 V / 1 mA	30 mA	1.90.690.228/0000
red	1.9 V / 20 mA	50 mA	1.90.690.269/0000
yellow	1.9 V / 20 mA	50 mA	1.90.690.267/0000
green	3.5 V / 20 mA	30 mA	1.90.690.285/0000
blue	3,6 V / 20 mA	30 mA	1.90.690.282/0000

8.25 mm	blue transparent	5.30.759.042/0000

Required spacer length
 For keyboards: Overall height of key - front panel thickness - 0.5 mm (area embossing).
 For RAFIX 22 FS: 9.25 mm - front panel thickness - thickness of overlay, if existing

RAFIX 22 FS⁺ Protective Collar

→ Description	Order no.
Protective Collar for emergency stop RAFIX 22 FS ⁺	5.00.456.001/0000

CONTROL COMPONENTS

RAFIX FS TECHNOLOGY - SPECIAL ACCESSORIES

- Table (continued) - RAFIX 22 FS+ Protective Collar

RAFI protective collars protect the pushbuttons from unintentional operation and damage. Another great advantage is that they can be mounted directly on the front panel using two screws and without mechanical attachment to the actuator and/or emergency stop pushbutton. This provides for additional safety because lateral forces are not transferred to the actuator housing.

When using the protective collar, the preliminary contents of EN ISO 13850, chapter 4.3.9 and 4.5.1 have to be respected.

The protective collar is not allowed with RAFIX FSR Emergency stop pushbutton 1.30.283.xxx. The protective collar 5.00.456.002/0000 from RAFIX 22 QR should be used instead.

The protective collar must not be used with RAFIX 22 FS+ Emergency stop pushbutton compact 1.30.273.301/2200
